

**Bio – Rob Del Core**

Rob Del Core has extensive experience in the fuel cell, energy storage and heavy duty hybrid electric drive systems industry and for the last 6 years has been focusing on the transit bus and heavy duty vehicle markets in US. Rob's expertise is in system integration for zero emission transport, with focus on fuel cell and battery energy storage systems. He has successfully led more than 20 zero emission drive system programs, managing all aspects of the program including design, build, test, delivery and deployment to customer relationship. His most recent project is leading the design and development of the Fuel Cell Hybrid Buses for Transport for London, UK while he was the project director at ISE. Rob also held various technical leadership positions at Hydrogenics and ISE Corporation before recently re-joining Hydrogenics Corporation as Business Development Director for Heavy Duty Mobility Applications.
